PARKEVILLE HYDROPATHIC INSTITUTE.

A meeting of the Board of Managers of the Parkeville Hydropathic Institute, held fifth month 15th, 1850, Joseph A. Weder, M. D., was unanimously elected President.

Having made various improvements, this institute is now prepared to receive an additional number of patients; and from Dr. Weder's well-known skill and practical experience in Europe, and his personal presence in the Hydropathic system, and for several years past in this country, and particularly in the city of Philadelphia, (where he has been practicing for several years), he believes the afflicted will find him an able and an attentive physician.

The domestic department being under the charge of a Stewart and Matron will enable the Doctor to devote to the patients whatever time may be necessary.

Application for admission to be made to

Office No. 58 South Fourth street, residence No. 16 Logan square, Philadelphia.

General Description of the Parkeville Hydropathic Institute.

The main building is three stories high, standing back from the street about 100 feet, with a semicircular grass plot in front, and contains thirty to forty rooms.

The grounds around the house are tastefully laid out with walks and planted with trees, shrubs, &c. On the left of the entrance to these grounds is a colonnade containing four rooms, used by male patients as a bathing house, with a convenient for "packing," bathing, &c.; on the right of the entrance is a double two-story building, which stands a similar cottage, used by the ladies for similar purposes.

In the rear of the Institute, at the distance of one hundred feet, are three other cottages, each eighty feet apart. One of these is the laundry; with a hydrant at the door; the other two are occupied by the servants.

The Hydrant is situated in the rear of the cottages as well as into the main building, and all the waste water carried off by drains under ground.

THE WATER WORKS.

Consist of a circular stone building, standing on the brow of a hill, surrounded by a large oval reservoir containing five hundred barrels, brought from a never-failing spring of pure cold water in the side of the hill, by a "hydraulic ram," a self-acting machine of cast iron, kept constantly going, night and day, by the descent of the water from the spring. The surplus water is carried from the reservoir to a fountain in the water-works yard, surrounded by a circular fountain, in the first story of the water-works is a circular room, containing the donkey bath, which is a stream falling from a height of about thirty feet, and can be varied in size from half an inch to an inch and a half in diameter. Adjoining the donkey bath is a dressing room, with marble tables, &c.; the rinsing (for the cure of piles) is in the most convenient and pleasant manner, and is entirely under the control of the patient using the same.

There are many other appliances, which can be better understood by a personal visit. mar 24—

SEARS' PICTORIAL FAMILY PUBLICATIONS

are decidedly the best books that agents can possibly employ their time in supplying to the people of the United States. They are valuable for reference, and should be possessed by every family in this great republic. There is not a city or town in these United States, but in which these works are indispensable. They are adapted to the literary wants of the Christian, the patriot, the statesman, and the man of letters; and are not only books as well as well, but are such as an agent of good principle will feel free to recommend, and will be glad to see the purchaser again when they have been bought.

OUR PLAN.—The plan the publisher has so successfully carried out for several years, is the obtaining responsible names, who are well known in their own countries, towns, villages, and have time and disposition to circulate good and instructive books among their neighbors in private life. Agents are invited to order, when quantities of not less than twenty copies are ordered at one time.
